## Від укладачів

До бібліографічного покажчика включено документи з медичних наук англійською мовою з колекції відділу документів іноземними мовами, що зберігаються у фондах ОУНБ ім. Д.І. Чижевського.

Для зручності користування покажчиком матеріали в розділах розміщено за галузями медицини, усередині розділів – за алфавітом авторів і назв.

Бібліографічний покажчик складається з наступних розділів:

-  *Біологічні науки*
-  *Анатомія та фізіологія*
-  *Епідеміологія*
-  *Фармакологія*
-  *Радіологія*
-  *Внутрішні хвороби*
-  *Ендокринологія*
-  *Кардіологія*
-  *Хірургія*
-  *Інфекційні захворювання*

31. Kneisel, Carol Ren Adult Health Nurthing : A Biopsychosocial Approach / C. R. Kneisl. - Reading : Addison-Wesley Publishing Co., 1986. - 2352 p.

Анотація: The authors provide a multidimensional approach to health and illness. They present a synthesis of psychosocial and pathophysiological factors relevant to the nursing process as a foundation for clinical nursing practice. The chapters are authored by recognized nursing specialists who present an extremely well organized holistic approach to the care of the adult client. Although organization of the 13 units and 80 chapters follows the medical model of physiological systems, two introductory units consider conceptual approaches to health and illness based on shared experiences. The remaining units are devoted to system dysfunction and are organized according to a specific format: psychosocial/pathophysiological aspects, nursing processes, specific disorders, and surgical interventions. A strength of the book is the excellent use of student learning aids, including a two-color format, highlighted client implications, annotated nursing research, chapter highlights, bibliographies, suggested readings, and other resources. Liberal use of illustrations, case studies, and nursing care plans as well as a glossary contribute to the book's appeal. A welcome addition to the literature available for undergraduate nursing students and an excellent reference for students in other health sciences.

32. Kristal N. V. Pathophysiology : textbook / N. V. Kristal, V. A. Mikhenov, N. N. Zayko, Y. V. Byts. - K. : AUS Medicine Publishing, 2017. - 655 p. : il., tabl.  
Анотація: The textbook is prepared by a team of staff at higher educational institutions and academic research institutions of Ukraine, who are recognized experts in various aspects of pathophysiology that gives reason this basic textbook to be national. It is recommended for English-speaking students of higher medical educational establishments. The textbook can be useful for teachers and physicians of all specialties.

36. Simeonova N. K. Pathophysiology / N. K. Simeonova ; ed. V. A. Mikhnev. - 3 ed. - K. : AUS Medicine Publishing, 2017. - 544 p. : il.  
Анотація: У підручнику на сучасному науковому рівні викладено матеріал із загальної та спеціальної патологічної фізіології.  
На відміну від інших підручників з патофізіології вперше наведено матеріали, які адаптують організацію навчання до вимог Болонського процесу в контексті інтеграції до Європейського освітнього простору. Упровадження кредитно-модульної системи оптимізує педагогічний процес, допомагає студентам засвоювати теоретичний матеріал, підвищує значення самостійної роботи для формування пізнавальної діяльності і розвитку професійних навичок студентів. Зміст і структура підручника відповідають навчальній програмі й навчальному плану, сприяють підготовці студентів до ліцензійного іспиту «Krok-1. General medical training».  
Для студентів вищих навчальних закладів – медичних університетів, інститутів та академій з англomовним навчанням. Може бути корисним для викладачів цих закладів, а також для лікарів усіх спеціальностей.

40. Current Procedural Terminology: CPT 2002 / American Medical Association. - 4th. ed. - Chicago : AMA Press, 2001. - 598 p. : il.  
 Анотація: Current Procedural Terminology, is a listing of descriptive terms and identifying codes for reporting medical services and procedures performed by physicians. The purpose of the terminology is to provide a uniform language that will accurately describe medical, surgical, and diagnostic services, and will thereby provide an effective means for reliable nationwide communication among physicians, patients, and third parties. CPT 2002 is the most recent revision of a work that first appeared in 1996.

 Анотація: The revision of this concise overview of human disease continues the clinical orientation of the first edition by emphasizing common laboratory tests, frequency of disease and mental illness and deemphasizing histologic detail. The text provides a content outline at the beginning of each chapter, review questions at the end, and summary charts throughout. Many illustration, tables, flowcharts and schematic drawing help enhance understanding. This second edition features many new radiographs, as well as updated revised chapters on neoplasia and cancer, hematopathology and bleeding, vascular disease, the lung, immunology

and mental illness. Students of allied health, dentistry, pharmacy, and nursing, as well as physicians' assistants will find here an invaluable survey of human disease.

57. Williams, Luanne Kemp. Environmental Health Secrets / L.K. Williams, R.L. Langley. - Philadelphia : Hanley and Belfus, Inc., 2001. - 266 p. - (The Secrets Series)

Анотація: Environmental Health Secrets is an overview of relevant issues, diseases and health effects, control measures, rules, and regulations related to environmental pollution. The breadth of environmental health issues is so vast that not everything could be covered; however, the perspectives of medical, environmental health, toxicological, industrial hygiene, safety, legal, and regulatory professions, are well represented. This book is to serve as a reference for medical, environmental health, toxicological, safety, industrial hygiene, and occupational nurse professional. It also may be used as a study guide for professionals taking certification exam in occupational and environmental medicine and environmental health.

58. Wingate, Peter The Penguin Medical Encyclopedia : довідкове видання / P. Wingate. - 2th. ed. - Harmondsworth : Penguin Books, 1983. - 487 p.

Анотація: This encyclopedia - which has been revised and brought up to date - is addressed to anyone who is concerned with the care of sick people and in particular to the patient himself, who should be the doctor's principal colleague.

60. Byer, Curtis. Dimensions of Human Sexuality : монографія / C.U. Byer, L.W. Shainberg. - 4 th ed. - Boston : McGraw-Hill , 1994. - 672 p

Анотація: Dimensions of Human Sexuality is a basic text for college human sexuality courses that include both the behavioral and biological aspects of sexuality. Although many good texts are available for such courses, this book differs from other college human sexuality texts in its balance between behavioral and biological material, its readability and clarity, and its attention to the many ethical considerations in the expression of human sexuality.

(Annual editions)

62. Hyde, Janet Shibley. *Understanding Human Sexuality : учебний посібник* / J.S. Hyde. - Fifth edition. - New York : McGraw-Hill Book, 1994. - 768 p.

Анотація: This trusted text examines the biological, psychological, and social science of human sexuality, provides practical information needed for everyday living, and familiarizes students with research methods used in sexuality. The author team features a unique combination of a psychologist and a sociologist, which gives this text a distinct interdisciplinary perspective.

63. Kelly, Gary F. *Sexuality Today : The Human Perspective* / G. F. Kelly. - Boston : McGraw-Hill Higher Education, 2006. - 593 p. : ill.

64. LeVay, Simon. *Human Sexuality : навчальний посібник* / S. LeVay, S. M. Valente. - Sunderland : Sinauer Associated, Inc., 2002. - 628 p. : ill.

Анотація: Sexuality is a central but highly controversial aspect of human nature. In this new undergraduate textbook, Simon LeVay and Sharon Valente aim to help students understand the diversity of human sexual expression as well as the various perspectives from which sexuality can be viewed. These perspectives range from biology and medicine, evolutionary theory, cognitive science, social psychology, feminism and cross-cultural studies to moral and political discourse. Rather than attempting to present cut-and-dried answers to contentious or unresolved sexual questions, the authors present solid data and a multiplicity of interpretive viewpoints.

## **V. Епідеміологія**

65. Vynograd, Nataliya Oleksiyivna *General Epidemiology : study guide for students of higher medical education institutions of the 3rd-4th levels of accreditation* / N. O. Vynograd ; The Min. of Educ. and Science of Ukr. - 2-nd. ed., corrected. - K. : AUS Medicine Publishing, 2016. - 128 c. : tabl.

Анотація: The study guide was prepared according to the typical syllabus for Epidemiology with due account of the qualification description and standards of training on the basis of regulatory and binding documents of the Ministry of Health of Ukraine. The book sets out in concise detail the fundamentals of general epidemiology and approaches to prevention of epidemiological complications, protection of the population and territory from the spread of infectious diseases.

The study guide is intended for students and internship doctors of higher medical education institutions of the 3rd—4th levels of accreditation.

70. Computed Tomography of the Head and Neck / Ed. By A.N. Hasso, T.H. Newton, W.P. Dillon. - New York : Raven Press, 1988. - 474 p : ill.

Анотація: A compilation of the first decade of clinical research on the

application of computed sectional imaging based on differences in x-ray attenuation. Publication was postponed until the field had matured enough to provide a referenced text containing both state-of-the-art imaging and important clinical, epidemiologic, and pathologic data. Twelve chapters.

71. Jeffrey, R. Brooke. Sonography of the abdomen / R.B. Jeffrey. - New York : Raven Press, 1995. - 418 p. : ill.

Анотація: Stanford University, California. Text of current clinical information and findings common in the practice of abdominal sonography, for practitioners and residents. Includes tips and the strengths and weaknesses of sonography. Color and halftone illustrations. DNLM: Abdomen - ultrasonography - atlases.

72. Naidich, David P. Computed tomography and magnetic resonance of the thorax / D.P. Naidich. - New York : Raven Press, 1991. - 606 . : ill.

Анотація: The thoroughly revised edition of this classic reference provides authoritative, current guidelines on chest imaging using state-of-the-art technologies, including multidetector CT, MRI, PET, and integrated CT-PET scanning. This edition features a brand-new chapter on cardiac imaging. Extensive descriptions of the use of PET have been added to the chapters on lung cancer, focal lung disease, and the pleura, chest wall, and diaphragm. Also included are recent PLOPED II findings on the role of CT angiography and CT venography in detecting pulmonary embolism. Complementing the text are 2,300 CT, MR, and PET scans made on the latest-generation scanners.

### **VIII. Внутрішні хвороби**

73. Brewerton, Derrick. All About Arthritis : Past, Present, Future / D. Brewerton, [б. м.], 1995. - 317 p.

Анотація: This book - intended to dispel the mystique and folklore surrounding arthritis - is the to explain clearly the scientific aspects of arthritis research and treatment. Brewerton tells the intriguing story of arthritis research, from the days before germs were recognized as causes of disease and when reasons for inflammation were obscure, to the present, when breakthroughs in genetics, epidemiology, X-ray crystallography, cell biology, and molecular biology support major advances in research and treatment.

74. Hypertension : Pathophysiology, Diagnosis, and Management: in 2 vol. / ed. J. H. Laragh, B. M. Brenner

Vol. 1 : Hypertension : Pathophysiology, Diagnosis, and Management / ed.: J. H. Laragh, B. M. Benner . - 2nd ed. - New York : Raven Press, Ltd., 1995. - 1766 p. : ill.

Анотація: The thoroughly updated Second Edition of this classic work incorporates the past five years' groundbreaking advances in basic and clinical research on hypertension. More than 350 of the world's leading basic scientists and clinicians provide authoritative and new coverage of the pathophysiology, diagnosis, and treatment of hypertension and the broad range of associated heart, kidney, brain, and ocular disorders. Over 150 new contributors have been selected for the Second Edition, and some 65 new chapters review the most recent discoveries, from molecular and genetic mechanisms of hypertensive cardiovascular disease, to new classes of drugs, clinical trials of innovative drug therapies, and promising drug developments that are still in the laboratory. The Second Edition includes reviews of new classes of drugs such as angiotensin II receptor antagonists, renin inhibitors, dopamine agonists, and prostaglandin analogues as well as up-to-date guidelines for designing individualized drug treatment regimens. Close attention is given to new molecular biologic research on possible genetic mechanisms and to the potentials for gene directed therapies. Noted experts discuss new diagnostic procedures that result in more sensitive evaluations of target organ damage. Also included is a new section on hypertensive disorders caused by genetic defects.

 Анотація: Anxiety is a number one health problem, and AN END TO PANIC by a psychologist specializing in panic disorders and agoraphobia provides describes the latest treatments for panic disorder. Simply written and arranged,

and with step-by-step instructions, the book first explains how panic builds up, and then becomes a hands-on guide to recovery. "We have nothing to fear but fear itself" is a well-known dictum that fits the premise of this book perfectly. People who panic are as terrified by their panic symptoms - a racing heartbeat, dizziness, hot flushes, loss of control - as much, if not more than they are by the object of their anxiety. AN END TO PANIC teaches readers to feel the symptoms of anxiety without the anxiety itself, along with ways to cope with stress and conflict, fearful situations, and avoiding relapse.

114. Kazumasa Muratsu. Teeth are Our Organs : наукове видання / Kazumasa Muratsu. - Fukuoka-city : KOS, 2010. - 535 p.  
Анотація: Teeth were found to be not the tools for eating foods but our "organs". It has not been considered so far that abnormality of teeth would be responsible for inconvenience for ingestion but would not affect systemic health at all. However, in the animal experiments on dogs, it was revealed that alterations of bites resulted in bending the vertebral column whereby it was

confirmed that improvement of abnormal bites in humans contributed to recovery from abnormal curvature of vertebral column. According to "the Survey on healthy degrees of vivid elderly persons" performed by the Health Science Center of Kyushu University, it was disclosed that teeth affect autonomic nervous system functions to change sputum secretion and blood pressure, indicating that individual tooth possesses different systemic transmission of information, namely the organ features. Based on these findings, "Hazo theory (Teeth are our organs, "Hazo")" has been proposed. During the process of verifying this "Hazo theory", we applied to the clinical settings the dental treatment which has been programmed by this theory. As the result, improvement of various systemic symptoms beyond the conventional medical consensus has been attained, whereby this "Hazo theory" has been proved. "Teeth are our organs." Really, "Teeth are associated with our lives." These facts indicate that the modern medicine has a serious blind spot because the conventional medicine recognizes teeth as only a part of the intestinal tracts.

Анотація: The textbook is intended to provide medical students, interns, ophthalmology residents, as well as primary care physicians with a general approach to eye exam and treatment of the most common ocular diseases and emergencies.

In connection with the health care reform in Ukraine that includes, inter alia, the adaptation of achievements of modern European and American ophthalmology

in Ukrainian practical medicine, the authors included data on the latest world achievements and guidelines for ophthalmic diseases treatment.

The book contains the latest information on the eye anatomy, thorough ophthalmic examination, concepts of diagnosis, and recent advances in the treatment of the most common ocular disorders and emergencies. Most chapters are illustrated with color clinical photographs or illustrations. At the end of each chapter, key points, schemes, control questions, multiple choice tests, and clinical cases are given to help students prepare for practical lessons and future exams. The appendix provides ophthalmic pharmaceuticals sorted by classes.

134. Disorders of the pediatric spine / Ed. by D. Pang. - New York : Raven Press, 1995. - 668 p. : ill.

Анотація: In this comprehensive reference, leading experts in neurosurgery and orthopaedics provide a multidisciplinary approach to the diagnosis, treatment, and management of a wide array of pediatric spinal disorders. No other reference deals so thoroughly with both the neurosurgical and the orthopaedic aspects of pediatric spinal conditions. The book covers all major congenital anomalies and acquired disease states, including inflammatory, vascular, and neoplastic disorders. The unique multidisciplinary approach provides a balanced perspective on a number of key areas, including biomechanics, primary spinal neoplasms, scoliosis, Klippel-Feil malformation, spondylolisthesis, and rehabilitation. In addition to its coverage of pediatric spinal conditions, the book also contains major sections on embryology and biomechanics of the juvenile spine; the latest techniques for evoked potentials monitoring, urodynamics measurement, clinical evaluation, and neuroimaging of the pediatric spine; unique microsurgical and instrumentation techniques; and the latest specialized rehabilitation techniques for the myelopathic child. More than 800 illustrations, including 84 in color, complement the text.

135. Goldberg M. The dysmorphic child : Orthopedic Perspective / M. Goldberg. - New York : Raven Press, 1987. - 428 c. : ill.

Анотація: This text provides a systematic clinical classification of syndromes in which an orthopedic malformation is the most prominent feature. These syndromes are grouped according to the orthopedic malformation that they share in common and that makes them look alike to the orthopedic surgeon, e.g., polydactyly, syndactyly, club hands, congenital amputations, arthrogyrosis, and body asymmetry. Each of the major syndromes characterized by these malformations is discussed with respect to its natural history, inheritance pattern, and critical orthopedic components. Dr. Goldberg offers valuable guidelines for identifying these syndromes by a thorough history and physical examination and by careful observation of traits appearing in the child and its parents. Close attention is given to concomitant cardiac, hematologic, and other birth defects that must be considered in making surgical decisions, and concrete recommendations on the optimal method and timing of surgery are offered. For those orthopedists requiring a more extensive list of possible diagnoses of a dysmorphic patient, the less common syndromes having the same orthopedic malformation are briefly summarized in tables.

152. Sabluk, Anatoliy Hryhorovich English for Medical Students : textbook for students of higher medical education establishments of the 1-st - 3-rd levels of accreditation = Англійська мова для студентів-медиків : підручник / А. Н. Sabluk, L. V. Levandovska ; The Min. of Public Health of Ukr. - 3-rd ed., revised. - К. : AUS Medicine Publishing, 2015. - 567 с. : ill.

Анотація: Підручник призначений для вивчення англійської мови за професійним спрямуванням для студентів вищих навчальних закладів I–III рівнів акредитації зі спеціальностей “Сестринська справа”, “Лікувальна справа”, “Акушерська справа”, “Медико-профілактична справа”, “Лабораторна діагностика”, “Фармація”, “Стоматологія ортопедична”.

Підручник складається з трьох частин, що включають низку занять, передбачених навчальними програмами. У кожному занятті пропонується певна ситуація, у якій може опинитись медпрацівник у процесі практичної діяльності: спілкування з пацієнтами, лікарями, медперсоналом; обстеження хворих і догляд за ними; ознайомлення з медичним обладнанням тощо. Крім тематичних текстів та граматичних вправ у підручнику подано завдання для самостійної позааудиторної роботи

студентів, тестові завдання для рубіжного та тематичного контролю знань, граматичний довідник та медичний словник-мінімум. Для спеціальності “Акушерська справа” окремо розроблено заняття з тем акушерсько-гінекологічного спрямування.

У підручнику використано сучасні оригінальні тексти з англійських та американських видань, підібрано найрізноманітніші види вправ, діалоги, рольові ситуації. У додатках є список неправильних дієслів, модальних дієслів та їх еквівалентів; поурочні словники спеціального курсу складаються з тематичної лексики з латинсько-грецько-українськими еквівалентами. Професійна спрямованість збірника допоможе викладачам та студентам впевнено вживати медичну термінологію.
